International Journal for

NUMERICAL METHODS IN ENGINEERING

Issue No. 1

Bruce Irons Memorial Issue

Bruce Irons: a Non-conforming Engineering Scientist to be Remembered and Rediscovered: I. Cormeau 1

A Different View of the Assumed Stress Hybrid Method: J. Barlow 11

Implicit Modelling and Mesh Refinement for Complex Structures: I. C. Taig . . . 17

The Patch Test—a Condition for Assessing FEM Convergence: R. L. Taylor, J. C. Simo, O. C. Zienkiewicz and A. C. H. Chan 39

The Patch Test for Elements: A. Razzaque 63

A New Nine Node Degenerated Shell Element with Enhanced Membrane and Shear Interpolation: H. C. Huang and E. Hinton 73

TRUNC for Shells—an Element Possibly to the Taste of Bruce Irons: J. Argyris, M. Haase, H.-P. Mlejnek and P. K. Schmolz 93

A Study on the Linear Elastic Stability of Mindlin Plates: Y. K. Cheung, A. H. C. Chan and L. G. Tham 117

An Assessment of the Semiloof Shell Element: T. K. Hellen 133

A Study of the Influence of Hierarchical Nodes on the Performance of Selected Parametric Elements: R. Delpak and V. Peshkam 153

Relations between Incompatible Displacement Model and Hybrid Stress Model: T. H. H. Pian and P. Tong 173

Optimal Design in Elasticity and Plasticity: G. Strang and R. V. Kohn 183

Ultimate Load Behaviour of Reinforced Concrete Plates and Shells under Dynamic Transient Loading: G. Q. Liu and D. R. J. Owen 189

A Study of the Efficiency of Iterative Methods for Linear Problems in Structural Mechanics: A. Samuelsson, N-E. Wiberg and L. Bernspång 209

Numerical Control of the Hourglass Instability: O-P. Jacquotte, J. T. Oden and E. B. Becker 219

Indexed or abstracted by 'Current Contents', 'Science Citation Index' and other leading Indexing/Abstracting Services

Continuous Stress Fields by the Finite Element-Difference Method: R. D. Cook and X. Huang 229

Program Structure and Architecture for a Finite Element Machine: D. H. Norrie and C. I. W. Norrie 241

Modifications to the Interpretation of the Stresses and Strains Determined Using Constant Strain Triangular Elements: R. Loov 249

Penalty-function Iterative Procedures for Mixed Finite Element Formulations: C. A. Felippa 267

Improved Strain Interpolation for Curved C^0 Elements: K. C. Park 281

Finite Element Methodology for Elastic-Plastic Fracture Problems in Three Dimensions: E. T. Moyer, Jr. and H. Liebowitz 289

CONFERENCE DIARY 307

ANNOUNCEMENT 308

Issue No. 2

Inverse Design Concepts in Engineering Sciences

Analytical Tools for Systematic Transonic Design: H. Sobieczky 309

Inverse Method with Geometric Constraints for Transonic Aerofoil Design: J. M. J. Fray, J. W. Slooff, J. W. Boerstoel and A. Kassies 327

The Design of Transonic Aerofoils by a Well-posed Inverse Method: G. Volpe and R. E. Melnik 341

Inverse Design of Multiholed Internally Cooled Turbine Blades: S. R. Kennon and G. S. Dulikravich 363

An Inverse Method for the Design of Axisymmetric Optimal Diffusers: N. M. A. Ahmed and D. F. Myring 377

Application of Elliptic Continuation Method for Transonic Aerofoil Design and Experimental Verification: G. Redeker, G. Wichmann and H.-Chr. Oelker 395

Inverse Design of Supercritical Nozzles and Cascades: E. Schmidt and P. Berger . . 417

Optimization in Design Processes: An Informatics Point of View: R. F. van den Dam, J. W. Boerstoel and H. A. M. Daniels 433

A Natural Formulation for the Solution of Two-dimensional or Axisymmetric Inverse Problems: L. Zannetti 451

A New Method for Solving Aerodynamic Hybrid Problem of Profile Cascade on S_1 Stream Surface of Revolution by Employing Stream-function Equation Expressed with Non-orthogonal Co-ordinate System: C. Naixing and L. Weihong 465

Nozzle Design Using an Iterative Dirichlet Approach: E. F. Brown and A. Eskandarian 481

CONFERENCE DIARY 495

Issue No. 3

Numerical Methods in Engineering: Theory and Applications

Computer Simulation of Crash Phenomena: J. Argyris, H. A. Balmer, J. St Doltsinis and A. Kurz 497

Finite Strain Plasticity in Convected Frames: P. Pegon and P. Guélin 521

Shallow Water Problems: a General Explicit Formulation: J. Peraire, O. C. Zienkiewicz and K. Morgan 547

Hydrostatic Loading and Stability Analysis of Structures with Large Displacements: P. G. Bergan and K. M. Mathisen 575

Influence of Rate of Porepressure Generation on the Stress-Strain Behaviour of Soils: M. A. Hicks and I. M. Smith 597

Thickness Effects of CCT Specimens: H. Miyamoto, K. Machida and M. Kikuchi . 623

Variational Analysis of a Slender Fluid-Structure System: the Elasto-acoustic Beam—a New Symmetric Formulation: R. Ohayon 637

A Return Mapping Algorithm for Plane Stress Elastoplasticity: J. C. Simo and R. L. Taylor 649

Nonlinear Analysis and Elastic-Plastic Load-carrying Behaviour of Thin-walled Spatial Beam Structures with Warping Constraints: W. Wunderlich, H. Obrecht and V. Schrödter 671

A Formulation of General Shell Elements—the Use of Mixed Interpolation of Tensorial Components: K. J. Bathe and E. N. Dvorkin 697

A Simple Rigid Body Algorithm for Structural Dynamics Programs: D. J. Benson and J. O. Hallquist 723

Snap-through and Snap-back Response in Concrete Structures and the Dangers of Under-integration: M. A. Crisfield 751

Numerical Technique in Plasticity Including Solution Advancement Control: K. Runesson, A. Samuelsson and L. Bernspång 769

CONFERENCE DIARY 789
